

Dr. Brownstein's Blog on Carrie Ann's Testimonial

There Is Still Hope Out There- Carrie Ann: "I have been nebulizing for 2 days and I feel great."

Meet my long time patient, Carrie Ann of Arizona, who was experiencing shortness of breath, severe headache, and fever. She has had a successful recovery by strengthening her immune system with high doses of vitamins A, C, D, and iodine, followed by nebulizing with our solution of H2O2, saline, & minerals.

To All Our Health!

David Brownstein, MD is a conventionally trained Board-Certified Family Physician with the additional overlay of holistic principles.

While Dr. Brownstein does not claim to have a cure for any illness, he does believe that we can enhance the individual's immune system by supporting the 'host' & the terrain of the host. The human body is well designed and the immune system, when given the proper support, can optimally function.
